

案 WEBSITE GUIDE

byaccuor.com,
in five minutes.

How the site is organised, what you'll find in each place and —above all— how to use Accuorina, our AI assistant, and the magnifier search. Made to share with clients, distributors and friends.

2026 edition

水 THE IDEA

A website that *explains itself.*

byaccuor doesn't filter water: it designs it. It takes mains water, purifies it completely and re-mineralises it to the chosen profile, at home and on the spot.

The site tells that whole story and adds two aids so no one gets lost: an AI assistant, Accuorina, and a magnifier search on every page.

We don't filter water. We design it.

道 HOW TO NAVIGATE

Six doors,
for who you are.

The top menu has six entries. Each speaks the language of whoever decides in that area; enter through the one closest to your case.

01
Home
For your home: choosing everyday water, how it's installed under the sink and which unit fits.

02
Projects
For architecture and interior design: dimensions, connections and how it's specified in a project.

03
Kitchen
Water as the first ingredient: which water for stocks, coffee, pasta or fish. VALENTI lives here too.

04
Horeca
Hotels and hospitality: producing water at the point of service with accuor MAX I. Let the hotel be its own spring.

05
Business
Offices and industry: total cost versus the bottle, logistics and sustainability.

06
Distributors
For those who install and maintain: margin, territory and support. Plus BOX ONE, the demo case, and the OEM channel.

Everything *you can see.*

The product

The water menu —six nutritional waters: Okinawa, Aox-Diet, Hashiru, Hikari, Essential and Nara—, the units, how we do it (Biocore, Ecocore, Minbox), the taps and the EINHAUS and NOA brands.

VALENTI

The professional kitchen equipment we distribute: cooking, cold, washing and air, with product sheets and downloadable catalogues in seven languages.

Service

Accuor Refresh, on-demand equipment renewal; warranty, global support and byaccuor Direct.

Ideas & material

The blog, videos and downloads: catalogues, images and brand assets. And a door that doesn't sell: mindful hydration, the free app that tells you how much water you need today.

星 THE STAR

Accuorina, *AI navigation.*

Top right, on every page, you'll see «AI Navigation». It leads to Accuorina, our virtual assistant. Not just any support chat: she knows all the site's content and guides you calmly.

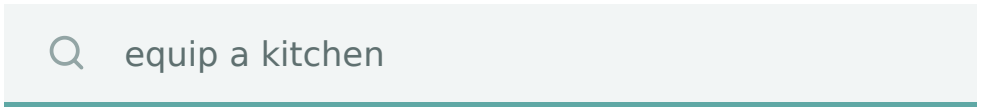

Honest by design: she says she's an AI, gives no prices or health advice, and never invents what doesn't exist.

- **Answers in your language**
  Detects whether the person writes in Spanish, Catalan, English, French, German, Italian or Russian, and speaks it.
- **Takes you to what you seek**
  Interprets what they want even without the exact words, and offers the internal links that solve it.
- **Helps choose the water**
  Like a pharmacy: shows options, never pushes, and lets the person decide.
- **Hands over to the team**
  When there's real interest, or someone asks for something not in the catalogue, she invites them to leave their contact.
- **Prepares a report for you**
  If you ask, she creates a personalised report of what you've seen and emails it to you — to download as PDF and share with whoever decides with you.

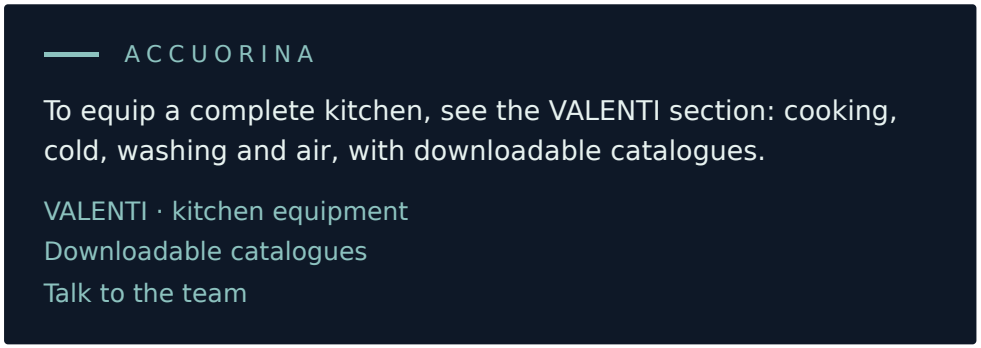

探 THE SHORTCUT

The magnifier:
type and it takes you.

In the top bar, next to «AI Navigation», there's a magnifier. Tap it, type what you're after and it takes you straight to Accuorina with your query already posed.

Also: «coffee shop», «water for the baby», «warranty»…

There Accuorina answers directly: one sentence and the internal links that solve what you asked. Anyone finds in seconds what they need without knowing the site's structure.

語 DETAILS

Seven languages, *losing nothing.*

The whole site —pages, sheets, blog and Accuorina herself— is in all seven.
The selector is top right.

Español	Català	English	Français	Deutsch	Italiano	Русский

VALENTI's catalogues are always available in all seven, regardless of the browsing language.

分 AT A GLANCE

The whole *site map.*
